

ORACLE DATA CLOUD SEGMENT SUMMARY

Generated: Thu Dec 09 2021 12:46:11 GMT-0800 (Pacific Standard Time)

Oracle Advertising Segment Summary

Oracle Advertising helps advertisers connect to consumers online who may be interested in their products or services. We take pride in our commitment to providing transparent and accessible ways for consumers to access this information.

This PDF provides you with the type of third-party interest segments that are available to Oracle Advertising customers and partners. Please note that the interest segments you see within this PDF are associated with the specific browser, computer, or device that you are using to download this PDF at any given time. You may see different segments when downloading the PDF from a different browser, computer, or device.

Oracle Advertising creates third-party interest segments to help enable Oracle Advertising customers and partners to market products and services to you based on your interests; to analyze and optimize the use, function and performance of Oracle products and services; to manage the security of our sites, networks and systems; and to comply with applicable laws and regulations and to operate our business. Oracle obtains data from partners who provide online data (such as cookie ID, IP address) and offline data (direct identifier such as name, email, and address) to Oracle.

For more information regarding Oracle Advertising's collection and use of your personal information, including information about the categories of sources, the categories of third parties with whom Oracle Advertising shares information, and the purposes for which the personal information will be used is available in the:

Oracle Advertising Privacy Policy.

Oracle and Partner Segments

This document provides the interest segment paths Oracle Advertising and our partners have associated with your cookie, device or browser. Inclusion into a segment can occur through a variety of reasons. For example, visiting an online car dealership site may indicate you are in-market for a new car, or purchasing a pair of high heels from one of our partners may indicate you are a women's clothing shopper. Furthermore, your online browsing or offline behavior may show similar patterns to those in-market for a new car or a household shopping for apparel, placing you in a similar profile.

The detailed segment path names displayed in this document help marketers manage their campaigns through differentiated names. To help you read this PDF, the below example shows that this is an Oracle-created segment. The general category is "shopping", meaning that the user is interested in or likely interested in shopping, and the specific information for this segment shows that the user is interested in fresh & healthy shopping and cuisine. This information and the interest segment names are displayed in a manner to help advertisers better identify broad audiences that may be interested in their products or services.

Example of an interest segment created by Oracle:

Audiences by Oracle > Shopping > Shopping & Cuisine Style: Fresh & Healthy

Similar to the Oracle-created interest segment, inclusion in partner-provided interest segments is based on your online, and in the US only, offline behavior. The interest segment names are displayed in a manner to help advertisers manage their advertising campaigns.

Oracle obtains data from third party data providers. Our online Oracle Marketing & Data Cloud branded data partners are listed here in our catalog:

<https://www.oracle.com/applications/customer-experience/data-cloud/solutions/data-as-a-service/data-providers.html>

Which includes a comprehensive list of our current EU/EEA data suppliers. Please note that some of these partners only provide information about individuals in specific regions.
